

Barging from Tanjung Langsat, Johor Malaysia to Singapore for transshipment

Pic 1: 1x unit production jumper at dim: 5.50 meter dia x 3.13 meter, weight: 21 ton.
Loading onto barge using crawler crane in Tanjung Langsat, Johor Malaysia

Pic 2: Cargo base is installed with rollers.
Customized huge wooden blocks are used to prevent rolling movement and damaged of rollers.

Pic 3: View of wooden blocks jacking up the production jumper, with rollers free from barge deck/ground

Pic 4: Cargo discharge using mobile crane from barge onto lowbed trailer in Jurong Port, Singapore

Pic 5: Mobile crane off-loading cargo from trailer onto ground for short term storage, pending for connecting vessel to Australia
